

—AN INVITATION TO PARTICIPATE IN THE—

2014 FORUM ON ULTRASOUND IN MEDICAL EDUCATION

A ROADMAP FOR INTEGRATING ULTRASOUND INTO MEDICAL SCHOOL CURRICULA

June 1–2, 2014

New York Hilton, New York, NY

—HOSTED BY—

The American Institute of Ultrasound in Medicine (AIUM) and
the Society of Ultrasound in Medical Education (SUSME)

Topics:

- How ultrasound changes the learning of anatomy
- Curriculum development
- Overcoming implementation challenges
- Value of the student experience
- Hands-on stations highlighting key anatomical areas

Who should attend:

- Deans
- Associate deans
- Curriculum developers
- Anatomists and physiologists

Benefits of ultrasound as a teaching tool:

- Provides a dynamic and comprehensive understanding of anatomy and physiology
- Its robust learning experience attracts the brightest students
- It gives medical schools a competitive advantage
- Ultrasound has applications across almost all specialties; it is already being integrated into daily practice

Schedule:

June 1, 2014—Evening Reception

June 2, 2014, 8 AM–3 PM—Forum Workshop

Why attend:

A growing number of medical schools have successfully introduced ultrasound into their curricula, which serves the school in multiple ways. It attracts potential students and it is an efficient and highly effective way of introducing anatomy and physiology—in real time—in the classroom.

Travel funding is available (hotel and transportation) through a grant from the AIUM's Endowment for Education and Research Fund.

Steven Goldstein, MD
AIUM President
Professor,
New York University
School of Medicine

Richard Hoppmann, MD
SUSME Founder
Dean Emeritus,
University of South Carolina
School of Medicine

"The use of point-of-care ultrasound is expanding rapidly throughout the entire continuum of medical specialties."

"Please join me and other deans/associate deans at this groundbreaking forum."

The AIUM is a multidisciplinary medical association of more than 10,000 physicians, sonographers, scientists, students, and other health care providers. Established more than 50 years ago, the AIUM is dedicated to advancing the safe and effective use of ultrasound in medicine through professional and public education, research, development of guidelines, and accreditation. Visit our website at www.aium.org.

The mission of the Society of Ultrasound in Medical Education (SUSME) is to promote the use of ultrasound in medical education through development of educational experiences, research on outcomes, and distribution of results. Visit our website at www.susme.org.
